

BOD and President Column

Dear NAJUA Members:

As we wrap up the year of 2014, we wish you a prosperous and pleasant 2015.

Not too long ago, we gathered for our annual meeting and banquet in New Orleans, where Dr. Youling Xiong gave a great presentation about NAJUA's 8-year journey (for those who are interested but were not present at the annual meeting, the presentation is viewable on www.NAJUA.org). Dr. Xiong provided a vivid view of the path of our young organization, starting well before she was formally inaugurated in 2006, thanks to the generous support by our sponsors and selfless contributions from many alumni. We deserve to be proud of our accomplishments in those 8 years.

Among the dedicated alumni, we recognized Dihui Wang and Xingqiu Lou at our annual meeting as the recipients of the 2014 NAJUA BOD Award and NAJUA Outstanding Member Service Award, respectively, for their excellent service and positive impact on NAJUA over the many years.

We were also pleased to announce 4 NAJUA Best Graduate Paper Awards at the meeting. Before the annual meeting, NAJUA awarded 8 undergraduate scholarships to Jiangnan University students. Those awards play an important role in fostering our mission of promoting academic excellence and strengthening our ties with the younger scientists in our fields.

A few weeks ago, members have received an email notification about Jiangnan University Alumni Association's plan to solicit nominations and information for two books, namely 《青出于蓝》 and 《校友企业家企业简介》, on outstanding alumni and alumni-owned enterprises. Please self-nominate and/or nominate other alumni for such honors. We have enclosed sample documents as templates in the email. If you need more time for finishing the compilation, please let us know.

On behalf of the 2014-2015 BOD and ET members, we call for your continuous support to NAJUA by sponsoring our organization, events or awards financially and/or contributing your time and ideas.

Sincerely,

Ansui Xu
Chairman of the Board

Feng Chen
NAJUA President

REGIONAL ACTIVITIES

Toronto Area Labor Day Gathering

2014年九月一日下午，正值加拿大劳动节，天气虽说有些阴雨，但一群江南大学加拿大的校友及家属约三十人仍兴致勃勃地来到多伦多北部小镇范建华校友的新居。花园般的环境和华丽的装饰令大家赞不绝口，又由衷地感激主人的慷慨让这次相聚是在美的环抱中。时隔一年，老友新朋问候寒暄，有说不完的话。品酩百家菜仍是重头戏。崔武卫校友深入浅出的有关膳食纤维与健康的演讲，让大家大开眼界，明白了如何“吃”才好，可溶性纤维太重要。之后的抢答题，场面热烈。校友罗域雄，谢国银，辛洪瑞，张义兴及NAJUA赞助的奖品丰盛，有Molson的啤酒，大统华的食品，Elite牌的保健品，Toyota手电筒式的钥匙圈及中秋月饼，人人喜气洋洋。为主人范建华切蛋糕唱生日歌，将聚会再次推向高潮，人生半载，事业有成，家和人兴，大家齐祝他福寿双全，万事顺兴。这次聚会是继去年Beer101之后的又一次主题式Reunion，大家都非常喜欢，意犹未尽。 - 王迪惠供稿

Gordon Research Conferences *frontiers of science*

Announcing the 2015 Gordon Research Conference on:
**Nanoscale Science and Engineering for Agriculture
and Food Systems**
An Emerging Technology

Date and Location:

June 7 - 12, 2015

Bentley University

Waltham, MA, USA

Organizers:

Chair/ Co-Chair: Norm Scott & Hongda Chen

Vice Chairs: David Britt & Cristina Sabliov

This conference establishes a scientific forum for researchers of Nanotechnology for Agriculture and Food Systems to present and discuss cutting edge, unpublished research with other experts in the field. In appreciation of the multi-disciplinary nature of this growing field, the program will include a comprehensive vision of critical and emerging research areas. We envision that this conference will encompass nanotechnology research advances across the field of agricultural science, inclusive of food science, plants/soil, animal science, bioenergy, health and wellness, societal acceptance and environmental sustainability. In the past decade, there has been a rapid increase in scientific advances in the field of nanotechnology in agricultural and food science and engineering. With these advances has come an increase in funding for related research. Despite these advances, there is no regularly established forum to present and discuss cutting-edge, unpublished research in the field of nanotechnology for agriculture and food. Speakers will represent the diversity of researchers actively engaged in the advancement of nanotechnology for agriculture and food systems. We anticipate that the participants will be similarly diverse in nationality, gender, and career (e.g. academia, industry, government, NGO's and policy persons).

We welcome nomination of potential speakers and participants!
